

HW06 – API Testing – 23127065

- **Student ID:** 23127065
 - **Student Name:** NGÔ NGUYỄN THẾ KHOA (Ngo Nguyen The Khoa)
 - **Class:** 23KTPM3
 - **Course:** CS423 / CSC13003 – Software Testing
- This submission tests three distinct EShop APIs: POST /api/login (Pool A), POST /api/checkout (Pool B), and PUT /api/admin/orders/:id/status (Pool C). It contains 120 reviewed cases: 105 AI-origin candidates and 15 student-extension candidates.

Reproduce

Start the EShop backend on http://127.0.0.1:3000, then:

```
npm ci
npm run test:login
npm run test:checkout
npm run test:order
```

The test scripts intentionally fail when the SUT violates a requirement. Do not change expected results merely to make Newman green.

Verified summary
